Guarantee
All products are covered by a manufacturer’s guarantee against component failure and defects.
We are continually improving and modifying our product range and reserve the right to remove products or vary the specifications without prior notice. All dimensions state height first. All dimensions, graphics, information and any weights quoted are approximate and should be used as a guide only. We accept no responsibility for variance. E&OE
No matter what sort of space you are dealing with, or what your communications objectives are, we have a Modular solution that will meet your requirements. Our Modular range provides the best of both worlds, a compromise between cost-effective, portable solutions and the traditional custom-built joinery stand.

Take a look at our comprehensive range, created by our own in-house design team and built by our experienced production teams. You can choose from four possible Modular solutions to complete your project, allowing the freedom to let your imagination run riot.

**Formulate**
FORMULATE is a highly original concept, combining a unique mastery of the space using tubular structures and adding the infinite possibilities of printed fabrics for graphics. Aluminium tubes are used to create innovative shapes and structures that add value to your communications, these can be made to custom designs that meet your exact needs.

**Vector**
VECTOR is one of the most simple and versatile visual communication solutions on the market. It comprises an aluminium frame with a stretched textile or rigid graphic and can be adapted to any kind of location. There are many different styles, enabling all kinds of applications: wall-mounted, free-standing, double sided and with lighting.

**Linear**
LINEAR is an excellent choice for all Point-of-Sale communications and stands where you want to add value to flexible or rigid PVC graphics. You can choose between visible or hidden frames, depending on your requirements and preferences.

**Arena**
ARENA is an attractive tubular aluminium display structure which is both extremely lightweight and robust. Various sections can be assembled according to the space available and can then be covered with visual displays on fabric or flexible PVC.

---

**Our Product Range**
We are dedicated to delivering the widest choice of products from cost effective, to premium quality. We promise to continuously search for new and pioneering ideas bringing innovation and excitement to our complete range of portable display products. Our products cover a broad range of needs from simple cost effective display solutions to more comprehensive and specialist displays for both one-off and semi-permanent use.

**Design and Patent**
Some of the products in our catalogue carry a Worldwide Patent, some carry a Design Patent. All of our unique products are designed in the UK / USA and designs are registered. Due to variations in graphic substrates, graphic thicknesses stated are provided as a guide only. Always check the suitability of your substrate on the display unit before application.
Point of Sale communications

The secrets of success in Point of Sale design and display

The design and display at your Point of Sale plays a vital role in the shop environment in differentiating your offering and attracting customers. Your display must serve to arouse the curiosity of potential clients, it should make them feel welcomed and valued, at the same time creating the ambience that will spark their interest.

The window display is a key element, in promoting the identity of the shop, encouraging the client to walk in and discover your products. Therefore drawing attention from outside the shop is important, using effective visual communications, including free-standing, suspended or even illuminated displays. These can be regularly refreshed to promote new seasons or products and continuously be updated.

The decoration and layout of a shop interior must create the ideal environment in which to discover products. Wall-mounted communications are the most cost-effective media because they allow floor space to be used for product displays. Illuminated wall displays located behind the cash registers, can help to reinforce messages you wish to convey.

The aluminium frames of the Vector range fitted with displays in stretch fabric perfectly meet these needs.
Pop-up Stores: temporary is on trend

Now a part of everyday life, the temporary shop (or Pop-up Store), is THE current retail trend and very popular with the public. Whether it appears in a commercial shopping environment or in an area of strategic footfall, it gives the consumer the opportunity to experience your brand, albeit briefly, from a few days to a few months.

Top tips for success

To create a successful pop-up store, it is essential to:

- Choose a strategic site;
- Select an original and flexible layout and location;
- Choose the time of year and how long to be there;
- Set up entertainment events;
- Organise upstream communications: target your campaign on the geographic zone chosen, to obtain optimal return; set up partnerships with other brands; send out preview invitations to influential bloggers and journalists...

Creating successful communications at a Point of Sale is dependent on a solution that combines both an original design and the best value for money.

To ensure you make the right choice, it is important to consider your objectives and answer the following questions:

- Location:
  How much space is available to you?
  What are your potential constraints in terms of height and dimensions?

- Design:
  Application: wall-mounted, suspended or freestanding?
  Types of materials: fabric, rigid or flexible panels?
  Is back-lighting a requirement?

- Use:
  How often do you need to update your message?
  Must the visuals be changed by a professional or can this be done by the end user?

- Budget:
  What budget is available for your modular solution?
  How many Points of Sale need to be fitted?

Why choose a modular solution?

+ Cost effective
+ Design
+ Easy to assemble
+ Compact for easy transportation to several Points of Sale
+ Standard or bespoke
+ Unlimited refresh/update of messages

Using Modular solutions
Exhibition Communications

Why exhibit at an event?

Businesses that are aiming to drive brand recognition and to promote their products and services often choose exhibitions to help them achieve this.

There are many great benefits of this approach as an exhibition allows exhibitors to carry out a number of activities in a relatively short time-scale:

- Finding new customers
- Monitoring the market
- Presenting new products
- Increasing customer loyalty
- Business networking

Why choose a modular stand?

+ Lightweight and compact
+ Reconfigurable
+ Short payback
+ Durable
+ Easy to assemble
+ Standard or bespoke
+ Unlimited refresh/update of messages
+ Ergonomic design
Your stand - the cornerstone of your exhibit

Creating a stand that reflects your brand image, but not at any price.

The success of an exhibition is also dependent upon value for money. To make the best choices, you must list your objectives and answer the following questions:

- **Location:**
  What space is available to you? Number of open sides?

- **Design :**
  Type of materials: fabric, rigid or flexible panels?
  Can height be used for communications: use of banners, or allowing increased storage space?
  What storage space for materials, brochures, is needed?
  Is lighting needed to draw attention to your stand?

- **Usage:**
  How often will the stand be used?
  Does it need to be scalable (both shape and size)?
  How can you transport it?

- **Budget :**
  How much budget is available to build your stand?
  How many exhibitions do you need to attend before costs are recouped?
  Can the stand be reused in another setting: showroom layout, background display, etc.?

**Keys to success**

Making your exhibition presence a success requires a number of things:

- **Set three to five clear objectives, which will guide your Marketing Strategy during the event.**

- **Maximise the visual impact with a good quality stand promoting the company's image (open sides, suspended displays, good graphics, quality materials etc.).**

- **Implement effective communications and promotion strategies before, during and after the event including; emailing, invitations, social networking and promotional offers at the stand.**

Whatever the space, Modular products will bring you a wide choice of solutions.
Our Formulate range provides limitless branding opportunities. Our comprehensive range of Point of Sale and event stands are also complemented with hanging frames to prominently display brands and events in 3D.

By its very nature printing on fabric allows you to explore new possibilities in terms of both graphics and shapes. Graphic designs can be reproduced using dye sublimation processes, on stretchy material to allow a close fit to any shape, even the most unexpected ones! Installation is very simple and, because the displays are not very bulky, they are also very easy to transport.

1. Circle Hanging Structure
2. DS3 Designer 10 Stand
Original and innovative shapes that take centre stage

This simple and intuitive product is easy to construct in any environment. Formulate solutions are available in many configurations, including: totem poles, three to nine meter wide image walls, columns and arches; and they can also be made to measure.

The main purpose of Formulate is to give you a design solution that works where traditional wooden or aluminium angular structures have limitations. The aluminium tubes can be moulded and folded, to suit your needs. With Formulate you can let your creativity run wild.

Assembly made simple

Formulate structures are made from 30 and 50 mm diameter anodised aluminium tubes.

Like a child’s construction set, each section has a clear numbering system to facilitate easy assembly.

In addition to providing a solid structure, the various angled connectors of our Formulate system also allow you to create multiple configurations using different connector types and the angles they provide.

360° Visual Communications

Formulate is characterised by its fabric graphic with zip system. Therefore the display has no visible joins and is double-sided, optimising the impact of the message.

// Custom designs - release your creativity

Custom-made solutions can be created to suit your specific needs. They offer exciting and innovative possibilities in terms of the shapes that can be created and the fabric graphics. They are designed to deliver maximum return on investment by displaying your brand in the most flexible and adaptable way for your needs.

Simply slide the graphics over the frame to complete your product.

Free-standing, with or without feet, depending on the curve of the frame.

Metal hooks for hanging structures.

Attach to an existing structure.
// Assembling Formulate

Assembling the Ø30mm sections

Assemble sections with push-buttons

Lock together using Allen key

Assembling the Ø50mm sections

Connector for 50mm tubes

// Different types of connectors for Ø30mm sections

TC-30-90T
90° connector

TC-30-S
Straight connector

TC-30-T
T-connector

TC-30-X
4-way cross connector

Tip:
All Formulate products come with cotton gloves to protect your graphics when being fitted to the frame.
Formulate

Tension banners

Nothing could be simpler to set up. For a 2D or 3D effect, single or double-sided printing. Formulate tension banners communicate on a large scale and adapt to all environments.

- Tubular aluminium structure Ø30mm
- Straight or curved sections
- Fabric graphic with zip system
- Customisable with double-sided print
- Easy installation without tools with coding system
- Ability to accessorise
- Carry bag included

Formulate Stands

Formulate stands are structures of original and modern shapes. Their unique style creates great branding communication.

Manufacturing Formulate tubular structures requires comprehensive production techniques; cutting, welding, and bending for example. Formulate printed fabric graphics offer many unique possibilities for branding and personalisation.

- Tubular aluminium structure Ø30mm or Ø50 mm diameter
- Fabric graphic with zip system
- Customisable with double-sided print
- Simple installation with coding system

**Expandable backwall**

Use the optional extra universal mounting system US901-C and add LED spotlights to your Formulate structures.
Formulate Columns

Formulate columns are impressive towers that are easy to arrange and decorate interior spaces. Available in several heights, these columns are ideal for highlighting a message. Used as a signalling point, as a signboard or for decorating, Formulate columns can easily be placed on a stand or in an exhibition hall.

The printed fabric graphic makes it possible to add branding and communicate your message on all four sides of the structure.

- Tubular aluminium structure Ø30mm
- Fabric graphic with zip system
- Customisable on all four sides with print
- Light and stable at the same time.
- Simple assembly without tools using just the coding system

Each sign has metal hooks attached to the structure.
Formulate Accents

Improving the functionality of Formulate structures and optimising the stand space is possible thanks to the different Formulate Accents elements.

Accents are made to complement Formulate structures and give more impact and visibility to brand messages.

- Tubular aluminium structure Ø30mm
- Fabric graphic with zip system
- Customisable with double-sided print
- Simple installation with coding system

Custom-made creations offer incredible possibilities in terms of graphic shapes and visual effect. They optimise return on investment by maximising brand communication in a more suited shape and format.

The best way to stand out

The use of larger formats is a great way to draw attention to a stand. The quality of Formulate can add to that impression and highlight the printed graphic and overall design as well as the unique shape of the stand.

Guarantee originality with uniquely shaped lightweight tubular structures and vibrant printed graphic fabrics.
**Original shapes that adapt to all environments**

The possibility of curving and cutting tubular structures, combined with the use of stretch fabric, creates custom made solutions for stands or items of furniture with infinite possibilities.

The possibilities offered by Formulate structures are unique. They enhance the message of brands thanks to the use of large-format visuals that perfectly match the contours of structures with ergonomic and innovative shapes.

What can we create for you?
Making Formulate structures more attractive and multi-functional is easy with various accessories such as screens, shelves, literature holders ... A new accessory system has been designed to give you the freedom to add and change items whenever you need them.

**Screen Stand**

Quickly identify your structure using the card holder

With great stability
The Vector aluminium frame system with stretched canvas display adapts perfectly to changing needs, tastes and projects, making it the simplest and most flexible system on the market.
Vector – The art of communicating

As a display wall, free-standing display or backlit solution, the wide selection of widths offered by the Vector aluminium frames provides a range of solutions for every requirement and every budget. You will benefit from the strongest visual impact and creative designs, which can be adapted for any location: showrooms, Point of Sale, exhibitions, museums and many others.

// Anodised aluminium profiles

Our Vector range has eight styles of aluminium frame which are perfectly suited for a wide range of applications. Our summary table will help you choose the right one for you.

* Available in standard modules for stand application
// Assembling Vector

Two different types of connectors depending on the profile

A. The push-button connector offers a faster mounting for the 50mm profiles.

B. For other profiles, the screw fixing bracket provides an economical solution.

Easy assembly of profiles and frames

The Vector range is characterised by its simplicity of assembly, a single multi-tool Allen key is sufficient to assemble the different frames.

Mounting a vector frame 50mm

Easy assembly with coded system on each section

Lock with Allen key

Each profile can be cut into smaller sections to facilitate its transport

Assembling frames together to create new structures

// Strengthening crossbeams and tubes

Depending on the format and environment in which your display is to be installed, its structure may need strengthening. As a minimum, we recommend the use of reinforcing tubes for backlit assemblies.

Perfect tensioned graphics

The textile graphics have a silicone gasket that makes their installation simple and fast. Begin by inserting the SEG at each corner and position the display from the centre to the corners.
20mm Quick Fix Profile

The Vector Quick Fix is the latest innovation in an extra-thin aluminium profile for stretch fabric graphics. Thanks to its versatile design this is a must for in-store communication and retail environments.

- Assemble angled sections with screw-in bracket
- 20mm Aluminium profile
- Optional shell scheme mounting bracket LN134

20mm Quick Fix Profile

- One profile, two applications: wall frames or shell scheme cladding
- Elegant and discreet thanks to its bevelled shape and its thickness of 20mm
- Rear profile for direct mounting to walls
- The assembly of the frame and the installation of the graphics are accessible to all

An ideal solution for interior decoration or store signage

Very small footprint

Ideal for interior decoration
We understand that when planning an event or exhibition your time is precious with potentially multiple suppliers to manage.

With our single source supply solution, leading industry expertise and incredible customer service, why not trust us to deliver both your product and printing requirements as a complete solution.

Our state of the art printing capabilities and expert sewing and finishing teams can save you time allowing you to concentrate on the finer details - growing your business.

Dye-sub, UV, latex and screen printing services all available in-house

Saving you time to grow your business
**50mm Profile**

- Quick assembly and disassembly
- Double-sided graphics available
- Multiple profile options to create a seamless look
- Can be used as double-sided free-standing or wall-mounted
- Available in standard and custom-made modules
- Full graphic option, rounded corners

**Technical information**

- Anodised aluminium 6063 T4
- Dimensions: 50 x 45 mm
- Weight per ml: 0.812 kg
- Double-sided profile
- Push-button connector assembly
- Textile SEG or rigid infills

From free-standing image walls to exhibition stands, Vector solutions offer you versatile designs that can be adapted to any type of environment.

With two different profiles individually suited to textile graphics or a rigid infill.
75mm LED Profile

Stand out with innovative and bright designs!

- Single-sided wall-mounted
- LED linkable lighting system for consistent lighting across the graphic.
- Fix it directly to the wall for a large format wall decoration
- Two channels for inserting two visuals; create optical effects by layering graphics
- Available in standard and custom formats to suit any environment

LED, a technology of the future

LEDs are considered by many to be a future technology in the field of general lighting.

The LED modules are ideally suited for retail and exhibition environments. They create an even and consistent illumination of light boxes, whilst remaining cool. This economical, linkable, low-energy, long-life solution is the number one choice for back lighting.

24v Transformer for LED lighting

- Transformer for linkable and backlit lighting
- Connect up to five LED strips in series
- Sleek design
- Integral fixing port for guiding the transformer inside the frame
- Cable system

- Transformer for linkable and backlit lighting
- Connect up to five LED strips in series
- Sleek design
- Integral fixing port for guiding the transformer inside the frame
- Cable system

Technical information

- Voltage: 24V
- Power: max 75W
- Input: AC 110/240V
- Output: DC 24V
- Supplied with fixing kit, cables and cable grommet
- Certification CE/ROHS®

Linkable LED lighting system

- Perfectly even lighting on large format frames without shadow
- Compatible with our single and double-sided frame solutions
- Wall and free-standing use
- The most economical solution on the market
- Simplified connectors for easy linking

Technical information

- Length of module: 360 mm
- Power of a module including five lenses: 13 W - 24 V voltage
- Luminous flux: 450 lm - Light temperature: 6500 K
- Round LED lens diameter 21 mm, optimised thanks to its angle of beam of 13 x 39°
- Link up to five LEDs to one transformer
- Simple and quick assembly
- Estimated life: 50,000 hrs
- Certification CE/ROHS®
- One year warranty

Combine all the advantages of Vector frames with optional additional accessories to create your custom-made display solution.
Vector Modules

Scalable solutions for your needs and budget

From the free-standing image wall to the exhibition stand, Vector Modules offer you versatile designs that can be adapted to any type of event.

This gives you the freedom to redevelop your stand as many times as you want, thus guaranteeing an excellent return on investment.

Each module is manufactured with 50mm aluminium profiles, supplied in sections of 1.25m and delivered in cardboard with assembly instructions. They are ready to be used with the visual of your choice. To ensure the shortest possible time, modules are available from stock.

Once your event is over, decide to store your booth at home, in a small box (1350 x 400 x 300mm) or re-use one of the modules to dress up your showroom.

Go from a stand 3m² to a stand 15m² in the blink of an eye!

Tips & Tricks
+ Accessorise your modules with literature holders, shelves or screen mounts
+ Use our modular briefs to better guide your customer
Accent Hybrids Vector

Give your display an Accent and stand-out!

The curves of Formulate combined with the Vector range create an original and innovative display solution. A multitude of custom-made configurations is possible, we offer standard shapes and sizes that are simple to incorporate with our Vector modules.

Each Accent is ready-to-use and includes the necessary elements to adapt it to a module in the Vector range. Choose from one of six Accent Formulates to give depth to your free-standing projects or modular stands.

- Tubular aluminium structure diameter 30mm
- Mounting on Vector frame by locks or clips
- Fabric graphic with zip system
- Double-sided customisation
- Numbered parts
- Simple to build

Custom-made Vector Stands

**15m² Stand**
- Profilled aluminium frames 50mm
- Fabric graphic with SEG

**Full Graphic Counter**
Customised counter tops with rounded corners. Available in several colours.

**Rounded corners**
More dynamic structures thanks to rounded corner profiles. Available in 50mm or 100mm wide.

**Halogen spotlights**
With 360° swivel head.

**Winning in height**
Give volume to your stands by adding walls up to 3.5m high.

**Frame with rounded corners**
Create partitions and reception areas for your clients.

**Stand 18m²**
- Profilled aluminium frames 50mm
- 3m² large storage space
- Fabric graphic with SEG

**Vector Quick-Fix**
20mm aluminium frame. Printed fabric graphic with SEG. Ideal to decorate your booth and give volume.

**Re-seen**
Increase the height of your backwall and increase your visibility by using a return extension.

**TV Screen**
Enhance your stand by streaming videos. Several models can be added to the Vector Walls.

*Screen not included*
Linear

The Linear range is perfect for applications such as image walls, stands and office layouts. It comprises aluminium frames used to provide the basis of a durable and solid structure, which can be used on a permanent or temporary bases.

You can take full advantage of this range in its many different forms by combining it with our Vector range to create secure storage spaces.
Linear – versatile in profile ranges and print media

Linear is a modular solution made up of several aluminium frames. It has been designed to offer an alternative to frames with fabric graphics. Its construction is based on channelled posts and strengthening cross-beams and it therefore allows you to add flexible printed PVC graphics or rigid printed panels to your structures.

// Assembling Linear

Linear frames can be slotted in thanks to a system of connectors, an integral part of the frame. At its most basic, all that is needed is one male pole and one female pole.

Assembly of a pole and a cross-beam using an Allen key to lock in place.

// Options for frame covering

Whatever materials you intend to use, you can choose to cover the frame either fully or partially.

A If you choose a flexible PVC graphic, an adhesive magnetic tape needs to be fixed to the back of the visual. A metal tape is bonded to the frame for the magnetic tape to fix to.

Flexible printed PVC graphics

B If you choose a cover made of rigid panels (5mm), you can insert each panel in the channel. If you intend to cover the whole structure, hook and loop can be fitted to the back and on to the frame.

Rigid printed panel graphics

Affix with hook and loop

// Anodised aluminium posts and beams with channel profiles

LN601 - 50mm round post - four connections
LN618 - 50mm round post - eight connections
LN602 - 75mm round post - four connections
LN604 - 75mm round post - eight connections
LN616 - 50mm square post - eight connections
LN607 - 75mm square post - eight connections
LN625 - 30mm beam
LN605 - 45mm beam
LN639 - 50mm Oval beam
Linear Backwalls

The Linear range is ideally suited for wall applications, stands and office fixtures.

- Linear anodised aluminium profiles with four connections
- Cover with flexible PVC or rigid (5mm) printed panels
- Standard kits supplied with a roll of metal tape (additional magnetic tape EM301 - not included)
- Optional accessories available

If your visual communications project is about handling space and layout, the organisation of an event or communications activity, we have the solution: the solution is ARENA.

The Arena framework is a visually attractive structure made up of aluminium tubes. It is a modular solution which is extremely stable and highly scalable. The various sections can be assembled, re-configured and re-used according to the requirements of each event.
Arena Structures

The 25mm aluminium tubes of the ARENA modular solution can be assembled and fixed together to create sections of various shapes and sizes in order to build the foundations of an imposing and solid stand structure.

A wide selection of tubular sections can be supplied to create a bespoke solution that meets your exact requirements.

// Assembling Arena

Components are supplied including nine straight sections, to create the structure you need, based on the type of transportation you select.

Create tailor-made display solutions with Arena components

- Section 2000mm
  - UT-S2000
The various sections can be put together using the screws and nuts supplied; so no additional tools are required for the assembly. The graphics (PVC or textile) are then secured using eyelets and bungee cords. Maximum visibility can be achieved by using six metre long spans that do not require any reinforcement. Tip: this also can be used as lighting structures.

// Arena Accessories

Gain functionality from an Arena stand by accessorising with screens, literature holders or shelves. You can also use the Arena structures as a light gantry by adding halogen spotlights.

- LCD Screen bracket ≤ 40 kg
  UT-LCD3

- LCD Screen bracket ≤ 15 kg
  UT-LCD1

- Metal literature holders
  TT401
  - Ten storage compartments

- Oval table
  TT400

- Half table
  Shown as a pair, sold singularly
  TT400-2

- Corner table
  TT400-1

Tables available in several colours

Sections assemble easily
**Arena Stands**

- 25mm dia. aluminium tubular structure
- Graphic attached by bungee fixings
- Accessorise with shelves, literature rack, spotlights

**Stand 18m²**

**Arena Kit 1**

**Free-standing wall**

**Shelving**

Attach shelves or literature racks to your structure to increase functionality
Ideal for double-sided graphics

Create a meeting area within your stand

Gain height and extra visibility!

Arena Kit 4

Arena Kit 5

Screen bracket:
Enhance your stand by streaming videos. Several models of screen holders can be added to Arena structures.

* Screen not included

Arena Kit 6

Lightweight and robust structure

Arena structures support up to 100kg for a range of 2m

* Screen not included
Dramatic Structures

Arena has been the structure of choice for the world of stage and theatre for many years. Its versatility means it is used for lighting gantries to regulate lighting uniformly on a stage as well as forming large graphic walls or arches.

By creating your own configuration, you ensure both a secure assembly of your event and bring a touch of originality depending on the layout of the elements.

Arena 36 m²

- Aluminium structure
- Ø25mm tubes
- Accessories available

Great stability

Gantries aren’t just for lighting! Get your brand communicating from on high

Up to 6m long without need for reinforcement
Accessories

Whether you are finishing an exhibition stand, a point of sale or a specific event, our modular solutions can be enhanced by a large selection of accessories such as counters, document stands and lighting solutions.

We also have a range of appropriate transportation solutions (bags and cases in hard and soft materials) to suit your requirements.
Displaying your documentation in a prominent, eye-catching way so that stand visitors will pick it up and take it away is an absolute must for communications professionals. Our literature holders, available in a vast choice of materials and finishes to be used in all kinds of environments, are the ideal complement to your modular stand solution.

**Quantum**
- Black plastic collapsible double-sided literature holder
- Five A4 pockets
- Foamed premium carry bag

Modular solutions come alive with lighting. Our full range of lighting includes halogen spotlights, LED spotlights and spotlights.

Powerspot 1000
- Powerful 120 Watt halogen spotlight for umbrella stands, Vector and Linear (optional fasteners)
- Available in black and silver
- Fixed arm of 250mm with 360° swivel head
- UK plug convertible to EU plug
- Universal mounting kit included

Model Code
Black PS1000-203E
Grey PS1000-103E
Bag for two lights AB101

Powerspot 1060 LED
- Silver LED spotlight with a power of 100W and a low consumption of 20 Watt
- Fixed right arm with 360° swivel head
- Built-in switch
- UK plug convertible to EU plug
- Universal mounting kit included

Model Code
Powerspot 1060 LED PS1060S
Bag for two lights AB101

Perfect for illuminating large exhibition areas!

LED spots offer a power of 80 Watt while consuming little as 12Watt, (that is 1200lm). Available as a single light (spot, fixing and linking cable) or double kit (two spots, fixings, cables and a transformer), they connect in series up to five spots on the same transformer. The moulded mounting bracket is compatible for Linear and Vector (universal mounting optional for other systems, except for LED Exhibition Spotlight) - UK plug convertible to EU plug.

Manufactured in the UK for a high quality end product

The creation of Vector, Linear and Formulate modular displays requires design ingenuity and precision engineering.

All stages of design and manufacturing are carried out locally by our own teams at our production facility.

This proximity allows you to benefit from the expertise of a partner who manages your project entirely, from its concept to its delivery.

Each structure produced is pre-assembled and tested before shipping and accompanied by full instructions. For ease of assembly, each module and section has a simple coded system.

With a wide selection of different modular solutions and configurations, you are sure to find the display solution that will meet your needs.
Perfect vibrant print for all Modular Displays

With the latest printing innovations our large-format printers can create vibrant graphics that enhance branding communication to set you apart from the competition.

To guarantee quality graphics that are adaptable for all uses, we have selected a wide choice of print media.

The diversity of materials allows us to meet your requirements in the shortest possible time.

Before shipping, all our graphics are completed by our highly skilled experts of our Finishing Team who control the quality and great finish of each and every order.
Advice and technical support

Wall frame, free-standing frame or exhibition stand, modular solutions offer you maximum visual impact and versatile designs that adapt to all types of environments.

With a wide range of standard and custom-made displays, you are sure to find the configuration that meets your needs and budget.

Our CAD department is at your disposal to guide you in the choice and design of the modular solution best suited to your project.

Our designers will advise you and offer fully customised and highly creative configurations.

You benefit from the expertise of a local partner who manages your project entirely, from its design to its delivery.
Our Services

+ Find the modular configurations of this catalogue and many more on our dedicated website: www.modular-brochure.co.uk

+ Our CAD department is here to help. Ask for a 3D rendering of your future project to give you an overview of the final result.

+ Demo videos and installation explanations are also available.

+ In order to better understand your project and enable us to bring you the best solutions, information sheets are available too - just ask your local dealer.
